

ZEROBASE

Pitch Deck 2026

PITCH DECK

THE CRYPTOGRAPHIC TRUST LAYER FOR GLOBAL FINANCE

<https://zerobase.pro/>

Date 2026 April

REAL-TIME ZERO-KNOWLEDGE PROOF GENERATION

Secure financial infrastructure with real-time, mathematically proven zero-knowledge circuits.
No trust required — just proof.

- Delta-neutral strategies generating real yield
- Verifiable execution via zero-knowledge proofs
- Designed for exchange-native distribution
(Earn / Wallet / Collateral)

APY	7.00%   +2.00% 
TOTAL VALUE LOCKED	\$ 56.74 M
TOTAL PROOFS GENERATED	5722795

THE INSTITUTIONAL ZERO-KNOWLEDGE STACK

Full auditability of computation: every computation traceable, transparent, and independently verifiable

Privacy-preserving by design: sensitive data protected throughout processing and computation

Verifiable execution of off-chain strategies: provable correctness of external strategy execution

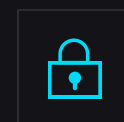

Transparent risk exposure via proof ranges: auditable risk boundaries through verifiable proofs

No custody risk (non-custodial design): users retain full control of assets

Compliance-aligned architecture (MiCA-ready): designed for regulatory compliance and reporting

DECRYPTABLE CIRCUITS AND STANDARDIZED PRODUCTS FOR INSTITUTIONAL USE CASES

- Increases user TVL through yield products
- Extends user lifecycle via Earn integration
- Enables collateral expansion for advanced traders
- Aligns with “hold-to-earn” user behavior

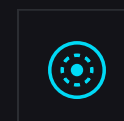

ZKLOGIN

Privacy-preserving authentication

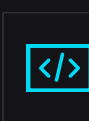

ZKCEX

The first verifiable CeDeFi staking mechanism delivering risk-neutral returns

ZKDARKPOOL

Confidential And Compliant Trading Environments.

ZKFI

The First ZK-Powered Stablecoin Staking Product Offering Risk-Neutral Returns Through Autonomous Arbitrage Strategies
